## Overview of Saskatchewan Open Data

In the absence of a centralized and coordinated open data initiative in the province, datasets in the province are spread across a number of levels of government (Federal, Provincial, and municipal) as well as a handful of ministries and crown corporations. This guide to Saskatchewan's open data provides you with a light on your path to access, download, and utilize government open data from Saskatchewan.

### Provincial Open Data

Data that is published by the Government of Saskatchewan for use by the public. Distributed in open, accessible, and machine readable formats.

### Municipal Open Data

Data published by a Municipal Government Saskatchewan has two municipal governments with official open data portals and several others that publish data, however have not established an official open data presentation online.

### Crown Corporations & Ministries

A Crown Corporation is wholly owned by the provincial government and Ministry is a part of the Government of Saskatchewan. Both groups can publish open data on their own information, reporting, or data portals.

### Federal Government Open Data

The Government of Canada collects a great deal of data that concerns provincial jurisdiction and publishes this information on its own data, information, and reporting portals.

# Provincial data sources

As of the date of this document, much of Saskatchewan's official open data has moved to a platform called GeoHub. This platform covers a great deal of geographic a location based data and includes online applications for viewing data, as well as download links in popular geographic formats like shapefile, CSV, Excel, and several others.
